CONDEMNED NO. 7 ON HAND.

Another New York City jury brought in yesterday a verdict of murder in the first degree, and another name is to be added to the six already standing with the court's death sentence against them. It took twelve men eleven minutes to decide that the prisoner in this latest case was a fit subject for the extreme penalty prescribed under the law. An Assistant District-Attorney said that a clearer case of deliberate, premeditated, intentional murder had not been presented to a jury for many years.

It remains to be seen if the law will now be allowed to take its course, or if there is to follow the same old line of appeals and peach, which is now endangered by a applications for Aabeas corpus and stays plague. of proceedings which have marked the cases of the six murderers lying in their cells at Sing Sing. THREE SUICIDES.

Three items of to-day's news deal with suicide, and each instance is worth attention from the motive which actuated the self-killer. A Lowell man cut his tiront and told his wife he did it for her sake, as be could not recover his health and refused to live to be a burden upon her. A Baltimore man killed himself because he had dissipated his fortune in lottery tickets. A Paterson youth of twenty, a young tough, after an interview with his good old mother, tried to hang himself in his prison have a man ill while the cigar is a Manilla. cell, probably through disgust.

It is the relatives of a suicide who have to bear the disgrace of his cowardly act. What respect can be due to a man who them unaided?

A little workman in South Plainfield was worried by some practical jokers who made him think his wife was firting. In a spirit of retaliation he sent telegrams to his of retaliation he sent telegrams to his mother and sister in a false name announce ing his death. Then he got drunk and secreted himself behind a pile of poles to see them come to his funeral. How he thought this was getting even with his wife is not apparent, unless he fancied her mortification at having a funeral party without any corpse for it. The little workman's soul was eased anyhow, which shows what a nice little soul he must have.

Two red lights right before him on the track made a Jersey Central engineer reverse his engine, sand the track, shut his eyes and wait for the fearful crash which seemed inevitable. As the frain slowed up low who has great expectations from a rich anything, he heard a mocking laugh and saw two bloyclers wheeling away.
